Introduction Of ATEK

ATEK Produces Successful Projects

ATEK was established in 2002 in Izmir/ TURKEY. Since of this time ATEK became a design, manufacturing, and erection facilities which is able to turn key projects.

Our Manufacturing activities are being done for 2 factories in A.O.S.B region area with powerful human resources in 22.000m² & 3.000 m² which 12.000 m² closed area .

The Name of Quality is ATEK

One of the important reasons for preferability of ATEK is its perfect customer focused quality system. ATEK is the name of quality with its international certifications of source efficiency in light of ISO 9001; 2000 Quality Management System.

Our fabrication and erection are in conformity with the international standarts (TSE, ASME, EN, API, DIN, ASTM, BS,...) and under the supervision of international audit firms. ATEK has aimed zero fault in Total Quality Management.

ATEK Experience

Our Cooperation has gained a strong notion and knowledge of engineering while sending products from Izmir to all over the world.

ATEK confides in acquired human resources and manufactures by using latest technology of our epoch with the quality system it has founded.

Our Facilities are Cement Industrial Plants, Oil Sectors, Pressure Vessels, Energy Sectors and Steel Structures.

ATEK Care About the Human, Health and Environment

ATEK that considers its employees as being of greatest value, has set up and set going* health, safety and environment system.

Our basic approach in manufacturing and assembling activities is to protect natural environment and to provide occupational safety of our employees before all else. Constant training and informing activities are being performed and employees are having to use accurate protective equipments. ATEK is international company with the social reasonability.

ÇİĞLİ A.O.S.B. FACTORY - İZMİR / TÜRKİYE

ENGINEERING / MANUFACTURING / QUALITY KNOW - HOW AND EXPERIENCE

QUALITY SYSTEM

Atek has instituted the Quality Management System with the participation of its employees and trying to actuate it, integrated and executing ISO 9001:2000, EN 3834-2 Manufacturing Proficiency Certificate. Successful projects through the years have warranted a strong basic facilities of engineering.

HEALTH, SAFETY AND ENVIRONMENT

- General HSE systems are being executed for protection of Health, Safety and Environment.
- All protection equipments that are being used by our employees are international (CE, EN...) certificated.
- Our aim is to protect natural environment and to leave aliveable world to next generation.
- Our employees are being trained about HSE continously, concerning human health, safety working and environment.

PLANNING AND PROJECT MANAGEMENT

- Setting Project Management teams
- Spectating the development of a project from the beginning till the end periodically and presentating to the customer
- Preparing time schedule of a project (MS Project)
 - Planning product & semiproduct

TRAINING

- ATEK is a company that believes in the necessity of training for keeping up with changing and developing market conditions. For this reason a training programme is being applied to all employees beginning from the employment date. Our training system as below;
- Orientation Programme
 - Internal Training (Technical, Quality)
 - External Training (Technical, Quality)
 - Toolbox Training (HSE, Technical)

MATERIAL AND INSPECTION

All equipments that we are using in our production (metal sheets, profiles, pipes, fitting equipments etc.) are certificated and they are being controlled by our qualified inspectors. Also as it is indicated in quality plans that we give to our customers, product-semiproduct inspections are being done by qualified Quality Personnel and the results are being given to customers

WELDING PROFICIENCY

- Able to execute SMAW, GMAW, SAW, TIG, FCAW, GTAW, welding processes.
- Welding proficiency according to EN 288 and ASME sec IX
- Qualified welders according to en 287-1 and ASME sec IX

EQUIPMENTS

- SAW Welding Machine ■ SAW Tractor ■ Automatic and Manuel Shot-grid Blasting Machine
- CNC Plasma Cutting Machine ■ Rolling Machine with 4 Cylinder ■ Angle Rolling Machine

KNOW-HOW AND EXPERIENCE

Successful projects that are being managed for 10 years improved Atek's engineering knowledges.

OUR SCOPE

OUR SCOPE

Our Quality Policy;

To provide quality products and service within the specifications of national and international standards with the leadership of the management and the participation of all employees. To realise customer demands on time without mistakes and to prevent waste of time and resources by doing the job right at first time.
